

DONE	Jessica Cheung	\$438.40	I would like to purchase several flexible seating materials for the students. This includes 4 balance balls, one set of 6 scoop rockers, and two sets of 6 floor cushions. I believe that the classroom environment and the comfort of the students is an important part of learning. Students should feel comfortable and safe in their learning environment. Allowing students choice of seating helps them make good choices about their learning.  I also need a classroom set of headphones (25) for projects using chrome books and/or iPads so the students can individually listen to books, songs, play-alongs and even create their own songs for composition projects.

DONE	Amy Shaker	\$157.97	Hi! With this opportunity that you so generously offer us, I would like to purchase tools for the students I work with as well as any others in the building that require more movement during their day to help them access their education. This will be for a number of different and appropriate fidgets, that provide sensory input, to allow their systems to get the input they need while assisting them to maintain their attention to learning. Some of these items include- chair bands, tactile bookmarks, tactile pencil toppers, tactile strips that attach to the desk to decrease the distraction of its use. I would also like to purchase some hand and finger strengthening tools to use with my students that need help in this area that will in turn increase their ability to manage and manipulate classroom tools. Thank you again for this opportunity to provide more tools to our students! It is much appreciated!
